TRANSCRIPT OF PROCEEDINGS

9

BOARD MEMBERS:

10

Ralph Sicuro - Chair

Rachael Heisler/Controller - Vice-Chair

11

Richard Ruffolo - Treasurer

David Lavelle/Council President

12

Rea Price - Deputy Director

William Urbanic -Treasurer

13

Jennifer Gula - Executive Director

14

Frederick Frank, Esq. - Solicitor

Robin Thompson - Financial Analyst

15

Jamie Wesner - Marquette

Robert Swartzwelder

1 PROCEEDINGS

2 -----

3 MR. SICURO: We will call our meeting to
4 order and we will first begin with roll call. Ralph
5 Sicuro here. Controller Rachael Heisler?

6 MS. HEISLER: Present.

7 MR. SICURO: Rich Ruffolo?

8 MR. RUFFOLO: Here.

9 MR. SICURO: Council President Dan Lavelle?

10 MR. LAVELLE: Here.

11 MR. SICURO: Deputy Director Rea Price?

12 MS. PRICE: Here.

13 MR. SICURO: Treasurer William Urbanic?

14 MR. URBANIC: Here.

15 MR. SICURO: We have one vacancy.

16 MR. FRANK: We have a quorum.

17 MR. SICURO: Anyone here for public
18 comments?

19 (No response.)

20 MR. SICURO: Seeing none.

21 Approval of the minutes.

22 MS. HEISLER: Make a motion to approve the
23 minutes from the December 2025 quarterly meeting.

24 MR. RUFFOLO: I will second it.

25 MR. SICURO: Any discussion on the motion?

NETWORK DEPOSITION SERVICES

Page 4

1 Seeing none. All those in favor signify by saying aye.

2 (All say aye.)

3 MR. SICURO: Opposed? None.

4 Bills and Communication. First we have a
5 report from our executive director.

6 MS. GULA: Good afternoon, everyone. The
7 funding of the pension is \$1.263 billion which is 77.89
8 percent funded as of December 31, 2025. The return on
9 the portfolio over the last 12 months ending the 31st of
10 December is 13.1 for the invested portfolio and 11.5
11 for the composite. Year-to-date the portfolio is 13.1
12 in the invested portfolio and 11.5 for the total fund.

13 The parking asset, which is also valued
14 through the end of December is valued at \$324 million,
15 and there is a statement provided in your packet which
16 shows the individual pension funding level and overall
17 liability as of the 31st of December 2025.

18 Additionally, the fourth quarter funding
19 payment was transferred to the fund on October 28, 2025,
20 and it was \$13.3 million for the parking asset, \$12.1
21 million for the MMO and \$7.2 million for the art which
22 meets the actuarial recommended contribution for a total
23 of \$32.8 million. Total funds transferred for 2025 was
24 \$100.4 million.

25 Does anyone have any questions?

1 MR. SICURO: Any questions?

2 MS. HEISLER: Would it be possible to get
3 that in writing either prior to the meeting or
4 afterwards for the record for us to have?

5 MS. GULA: Sure. What we can even include
6 is we set up a schedule which shows which payments and
7 how much each quarter will be distributed, and we can
8 distribute that ahead of time.

9 MS. HEISLER: That would be great.

10 MR. SICURO: I was going to ask if we could
11 have your report, if that's not too much trouble, to
12 have that in advance. If there is questions beforehand
13 we can ask you.

14 MS. GULA: Yes.

15 MR. SICURO: Next is the investment
16 consultant report, and we have Jamie Wesner from
17 Marquette.

18 MR. WESNER: We will be going through the
19 booklet that I passed out to review portfolio
20 performance and market performance for 2025. We also
21 have a preliminary market tracker in here for January
22 2026 just to show how the overall markets have
23 performed. As we know, markets are volatile and even
24 just the first few days of February have highlighted
25 that volatility. Some of the trades that happened were

1 working well in terms of the AI related stocks that have
2 sold off a little bit over the last couple of days. We
3 will talk about that and particularly in the context of
4 how that affects your portfolio.

5 And for the newer trustees, I want to walk
6 through a little bit of just asset allocation, how we
7 have the portfolio framed. What our long-term goals are
8 and how we have things positioned and how we made
9 modifications over the last few years.

10 If we go behind Exhibit 1 in the booklet,
11 just a quick update on the market. I would like to hit
12 the bottom footnotes first. For all the trustees, if
13 you need any additional education or just need some
14 insight in terms of market volatility or performance,
15 our research team puts out regular updates via email.
16 We also have additional information via LinkedIn or our
17 YouTube page. So just in terms of learning new stuff,
18 those are resources that are there. But myself and the
19 whole Marquette team is always there if you have any
20 questions in terms of kind of just introducing yourself
21 to the materials that are in our regular presentation.

22 Up at the top we do have forming partners
23 this year. I will just highlight the one that some of
24 you might have familiarity with. Bill Torre, who is a
25 Pitt native, Duquesne and Pitt alum. We hired him after

1 he was working here in Pittsburgh 9 years ago and is a
2 great addition to our partnership as are the other three
3 individuals as well.

4 I am going to skip over the next page which
5 is the January tracker. It is here for your
6 information. I will reference it loosely when I go over
7 the December figures, but I don't want to create a
8 disconnect by discussing January market performance and
9 then December portfolio performance.

10 We will go behind Exhibit II which is
11 highlighting everything as of year end 2025. Most all
12 of the figures within the tracker here, but within the
13 report as well, are through year end except for a few of
14 the alternatives. Some of the alternative investments,
15 private equity, private debt, some of those figures take
16 longer to report, and so some of those figures will only
17 be as of the last reporting date. Most of those would
18 be September 30, 2025.

19 But as we look at 2025 as a whole, it was an
20 exceptionally strong year. Given all the volatility
21 that took place, given, you know, tariff discussions
22 back in April 2025 and the market selling off, continued
23 geo-political unrest, challenges at home with domestic
24 policy, with immigration, it is very surprising to many
25 that the markets climbed the wall of worry which is a

1 term often used and are significantly higher.

2 2023 and '24 were exceptionally strong years
3 for equity markets. We entered 2025 at pretty rich
4 valuations. Meaning stocks were priced to a very
5 positive outcome, positive earning growth, and a lot of
6 that wasn't necessarily realized, but we continued to
7 see equity prices go up. So in 2023 and '24 the S&P 500
8 was up 20 to 25 percent in those two years. This year
9 or 2025, the S&P 500 was up 17.9 percent, another
10 exceptionally strong year. The analyzed 10 year return
11 for the S&P 500 is nearly 15 percent. So we are coming
12 off an exceptionally strong decade of equity market
13 growth.

14 Not to say that that can't continue but when
15 you valuations exceptionally high and coming off a very
16 strong performance, it has historically proved to be
17 challenging to continue that type of performance without
18 some type of kind of disrupting factor. It could be AI,
19 but that remains to be seen. And that actually is going
20 to be able to be quantified as significantly as some
21 anticipate.

22 The fixed income market in the upper right
23 side of the page, a lot of the fixed income market was
24 influenced by the pressures that were put on the Federal
25 Reserve and the Fed did cut interest rates three times

1 this year. So when interest rates get lowered, bond
2 prices go up, and the Federal Reserve really doesn't
3 influence the short end of the yield curb. If you look
4 at the chart in the top center of the page you can see
5 that the Fed influences the left hand side of that, kind
6 of short term, kind of less than a year in duration and
7 doesn't have the effect on the longer term interest
8 rates.

9 Longer term interest rates are what affect
10 mortgage rates, and the president has been vocal about
11 his frustrations of rates being higher than he would
12 like. Everyone would like lower interest rates, but the
13 one challenge is if you have interest rates that are
14 lower than necessary, that spurs inflation and you get a
15 situation like we had in 2022 where interest rates had
16 to go up significantly.

17 It is a balancing act. That's why the
18 Federal Reserve has historically been a non-partisan,
19 independent body, and that's one of the challenges right
20 now is it remaining that way, and a lot of that
21 discussion and pressure that's come from the
22 administration on to the Federal Reserve affects the
23 fixed income markets.

24 We did get a new Fed chair nominee, Kevin
25 Warsh. We will see if he gets confirmed. We will see

1 that process. There is a lot of political land mines
2 that kind of stand in the way of his confirmation, and
3 its potential to introduce volatility to the markets.

4 As a reminder, the current Fed chair Powell
5 is in his role until May of this year. When he leaves
6 that role, he still has two years left on his term as a
7 Fed governor. The potential is that he would stay in
8 that role to continue to influence Fed policy.

9 Historically when a Fed chair's term chair is up, they
10 resign their Fed governorship position. He prefers not
11 to do that to continue to have influence, and Senator
12 Tillis from North Carolina who has vowed to hold up the
13 confirmation of the new Fed chair nominee has said he
14 will not allow Powell to be forced out of his governor
15 position as a term of negotiation with the litigation
16 that potentially is going on against the Fed in terms of
17 overruns for their facility renovations. A lot of
18 moving pieces. Politics does not typically play into
19 Fed policy this way but it has. It has played in to the
20 market performance.

21 We typically say government elected
22 officials influence fiscal policy and not monetary
23 policy. Right now the lines are being blurred across
24 the board. So that is going to continue to influence
25 interest rates, but as a takeaway for 2025 our markets

1 were up 7 percent. All parts of the portfolio were
2 performing in a positive nature. So that's certainly a
3 nice thing to see.

4 Across the fixed income landscape, just the
5 other parts of the portfolio, the low investment grade
6 fixed income performed about the same as the investment
7 grade. So lower quality bonds which typically give a
8 higher yield with higher risk gave us about the same
9 return as the investment grade for last year. Most of
10 the bond returns were pretty similar.

11 Shifting back to equities, if you look at
12 the colored squares, the green squares and more notably
13 the blue squares in the middle of the page, this
14 highlights the different performances for the US equity
15 market. We continued to see in 2025, large caps
16 outperformed small caps, and growth stocks outperformed
17 value stocks. That has been a trend that has been
18 pretty persistent in the US markets for the last decade.
19 We have had periods where that hasn't held true, but for
20 the most part that has been the trend over the long term
21 for the US equity markets.

22 January and February we have seen a little
23 bit of reversal. Small caps outperformed in January and
24 value stocks outperformed in January. Does one month
25 make a trend, certainly not, but it is interesting to

1 see that volatility in the US market.

2 Another trend long-term, you know, a decade
3 long trend that did break in 2025 was the US
4 outperformed the international stocks. So this is the
5 second table down on the left-hand side of the page.
6 The non US equity returns, and it will be the second row
7 of figures there, the ACWI ex. US benchmark. That is
8 the broad international benchmark. You can see for 2025
9 that year-to-date figure was up 32.4 percent. So you
10 got a solid 14 plus percent more from international
11 markets versus US markets. So that was certainly a
12 break in the long-term trend of the US outperforming.

13 One of the factors for US outperforming for
14 so long has been US markets -- our markets are almost
15 half exposed to technology between true IT and consumer
16 services -- sorry -- communications services. That
17 makes up 45 percent of the S&P 500. So tech and tech
18 adjacent.

19 Internationally it is only 20 percent of the
20 markets. So if tech is leading the markets higher, the
21 US is typically going to outperform. Last year one of
22 the reasons that international markets performed so well
23 is that the US dollar weakened, and we got an 11 percent
24 extra return on our international stocks because of the
25 weakening dollar. So that was another positive factor

1 for international stocks over 2025.

2 And then internationally also, differing
3 from the US value, outperformed growth. The growth
4 companies are more consumer discretionary. Think of the
5 luxury good brands. Those companies did not grow as
6 much in terms of their prices last year, and we saw more
7 value stocks like European defense companies performed
8 much better, and that's why value internationally
9 outperformed growth so significantly.

10 Finally with the merging markets, I know
11 there is a lot of moving pieces here, but with the
12 emerging markets, which is a subset of international
13 equities, if you look at the table below which says
14 regional returns, the bottom three countries listed
15 there are the three largest emerging market countries --
16 China, Brazil and India. China is the largest, India is
17 the second largest and then Brazil is third.

18 China was up 31 percent, Brazil was up 50
19 percent. India was up 2 and a half percent. So the
20 performance of active managers in that space is really
21 going to be influenced by what their country exposure
22 was.

23 There are some emerging market managers that
24 intentionally under weight China because the information
25 we get out of China in terms of their government

1 statistics but even individual company information and
2 reporting requirements, there is less confidence in the
3 integrity of that data. So managers that under weighted
4 China intentionally underperformed last year, and you
5 will see that for one of your managers in your
6 portfolio. I wanted to highlight that because when you
7 see it in that table it is pretty eye catching.

8 MR. LAVELLE: Why is China considered an
9 emerging market?

10 MR. WESNER: It is the second largest
11 economy in the world right now which does seem counter
12 intuitive, but because it's still considered a
13 developing market because the various factors that the
14 benchmarking agencies utilize, things like per capita
15 GEP. So when you think of China in terms of number of
16 individuals in China who are still rural in nature that
17 are earning very little on a day-to-day basis, you know,
18 those factors can still have China as an emerging market.
19 The Chinese economy measured in aggregate is the second
20 largest economy in the world.

21 MS. HEISLER: How much of it is dictated by
22 the administration's trading priorities?

23 MR. WESNER: In terms of international
24 performance?

25 MS. HEISLER: Yes.

1 MR. WESNER: It definitely has an influence.
2 When you look at the challenges that we have had with
3 various, you know, the tariffs going out last year, in a
4 lot of these international countries, I forget the exact
5 terms that Canada has used -- the coalition of the small
6 and middle and just trying to work around and trade
7 around the US. That is definitely something that
8 prevented I think the international markets by going
9 down as much as one would have thought. If you said
10 these tariff levels were going to be implemented, you
11 would have thought you would have seen weaker
12 performance, but there were more work-arounds identified
13 and I think those will continue.

14 You've seen other trading partners, Canada,
15 doing certain trade deals with countries like China and
16 others kind of trying to go around the US. That will
17 influence all parties involved. It is kind of the
18 de-globalization of trade.

19 I think that term has gotten used a little
20 too loosely. The US has kind of stepped out of some of
21 that globalization. But other countries realize that
22 isolationism is not in their best interest. They need
23 to identify other trading partners outside the US to
24 fill the gaps that are left at these higher tariffs.

25 A lot of uncertainties, and for managers

1 that are trying to pick stocks that are going to
2 navigate this environment, it is challenging. Because
3 you are not just looking at the fundamentals of
4 companies. You have to see how geo-politics are going
5 to influence the costs that are put on the trading of
6 goods and how much it cost to ship goods from one
7 country to another. A lot of factors that have always
8 been present, but I think the priority of factors has
9 been re-ranked.

10 MS. HEISLER: Thank you.

11 MR. WESNER: And then everything else, and I
12 use that term loosely to say alternatives so hedge
13 funds, private equity, private debt, real estate
14 infrastructure, anything that was hedging performance
15 was not going to perform as well in 2025 because you
16 wanted the full exposure to the equity markets. So
17 diversifying strategies typically, although they may
18 have reduced volatility last year, they also reduced
19 absolute returns.

20 It is a challenging time now when you have
21 three years in a row where strong equity markets caused
22 investors to maybe question a little bit diversifying
23 strategies. Why do you have these strategies in the
24 portfolio that are holding us back. We just have to go
25 back to 2022 where equity markets were down 20 percent

1 and bond markets were down 12 to 13 percent as a
2 reminder that a lot of those diversified strategies
3 helped us as a portfolio not be down nearly as much as
4 those two major markets. It is challenging environment.

5 And then the most volatile area,
6 commodities, 2025 was volatile, but we have seen even
7 that volatility increase dramatically in 2026. Gold
8 prices last year up, you know, 60 plus percent. We saw
9 silver prices more than double. We saw a day last week
10 where silver prices were down 30 percent in a single
11 day. We have seen just extreme volatility in precious
12 metals. Bitcoin has now dropped below -- they dropped
13 below 67,000 which is a multi-year low for Bitcoin, and
14 there is potential risks of a downward spiral.

15 People lever themselves or borrow to buy an
16 asset, a speculative asset. When that asset goes down
17 you get margin calls and that can just further cause
18 more price declines. There is a lot of risks that are
19 out there in terms of kind of commodity or currency
20 linked investments.

21 We don't have any exposure to things like
22 Bitcoin. Very few institutional investors do, and this
23 is the reason why, the speculative nature of the immense
24 volatility. It would be nice if someone bought a
25 Bitcoin at \$1,000 a coin, but very few people did and it

1 not an institutionalized market place. It makes it very
2 hard with those with a fiduciary responsibility like
3 yourselves to put that in a portfolio like this.

4 MR. SICURO: Jamie, before you move on, in
5 the real estate side, we know that during COVID that had
6 a negative on real estate. We have come far from that,
7 and we are not seeing much of a rebound in the real
8 estate side. It seems to be rather low. Is there a
9 reason behind that?

10 MR. WESNER: The biggest challenge that it
11 faces is the office sector. We have seen so many office
12 spaces continue to have leases where the tenant just
13 either, A, goes out of business; B, trying to sublet out
14 where they have too much space or when leases are up for
15 renewal, they are taking half of the space. I have seen
16 a couple of my clients in Chicago who have dedicated
17 space, they have taken on half the footprint of what
18 they had before, but now have nicer buildings and pay
19 less rent. And those Class B and Class C buildings are
20 now very hard to rent.

21 There is always talk about office to
22 residential conversions. Again, if you look at things,
23 the plumbing stack in this building, it does not work.
24 It is hard to retrofit an old office building for
25 residential use. Some have been reworked in data

1 centers and things like that, but there is still a lot
2 being worked through in the office space. And then the
3 other major parts of real estate, industrial has still
4 done relatively well. It was growing very fast from '22
5 to '24, but it slowed down a bit, and then multi-family
6 housing, the challenge there is with higher interest
7 rates, there have been very little in terms of new
8 construction.

9 We do have a housing crisis in the US. It
10 is certainly more of a crisis in different parts of the
11 country, but when you are not building new homes, and
12 the cost of construction is too high, that is tough.

13 We have a current administration who says
14 they want to eliminate red tape for new construction
15 which is great, but the challenge is a lot of the
16 construction costs have gone up because of tariffs on
17 Canadian lumber, and that hurts the construction
18 industry.

19 There is all these different factors that
20 play together, and there is no simple solution.
21 Interest rates are one thing. If interest rates come
22 down, it is beneficial to real estate as a whole,
23 especially the housing, but there are other factors that
24 are going in the other direction and making things more
25 challenging. I wish there was more of an outlook for a

1 V-shaped recovery within real estate, but it is more
2 like a hockey stick recovery. We went down pretty
3 severely especially in office and it is going to be a
4 gradual recovery. The hope is you get back to where
5 real estate is giving us 5 to 7 percent net returns that
6 are a good diversifier.

7 You can see from last year, when we got the
8 final numbers for last year, we do have December
9 preliminary numbers for the indices, and they are up a
10 little less than 5 percent, and managers as well are
11 kind of in that same range. I would say 3 and a half to
12 5 and a half percent is the range. Those who went down
13 the most typically have come back the most, but it
14 hasn't been any type of V-shaped recovery.

15 MR. LAVELLE: Why is energy down?

16 MR. WESNER: That's what has kept overall
17 commodity prices -- if you look at the top row in the
18 table, GSCI is that Goldman Sachs commodity index, only
19 up 7 percent, but you can see the line below that,
20 precious metals up 80 percent. Energy makes up about
21 two-thirds of the commodities benchmark, and again, it
22 is another thing that is almost counter-intuitive. You
23 would think with all these geo-political issues, no
24 resolution in the Russian/Ukraine situation, continued
25 unrest in the Middle East. Highlighted by not only what

1 is going on in Israel but with Iran. But energy prices
2 continue to come down. Even with the Venezuela
3 situation, I am sure many of you are familiar with the
4 idea that the energy, the oil that is pumped out of
5 Venezuela is not the same quality of oil that is pumped
6 in the US or other parts of the world, and it is very
7 difficult to convert that oil into gasoline or other
8 things that we use here in the US.

9 So the question is whether that continues
10 that downward trend and energy prices continue. We have
11 gone up a little bit this year. Oil is up to about \$65
12 a barrel, but that is definitely something that is, I
13 would say, kind of bucking the trend of commodity prices
14 going higher.

15 So within the portfolio, going to the next
16 page and just highlighting the kind of overall lineup of
17 managers. For the newer trustees, this looks like a
18 long list of the managers on page two. The bottom half
19 of that list is alternative strategies, and I will say
20 the top half of that list makes up 80 percent of the
21 assets, maybe 85 to 90 percent of the assets, and the
22 bottom half is more 10 to 15 percent of the assets.
23 Those alternatives investments.

24 When we make investments in alternative
25 asset classes like private equity or private debt, we

1 often have to make an investment in a closed vehicle and
2 then three or four years later we make another
3 investment with that same manager in their next vehicle.
4 You end up with multiple line items with the same
5 manager name which is a subsequent fund. That's why you
6 see so many down there in some of those alternative
7 asset classes.

8 The larger areas of the exposure for example
9 the S&P 500 index fund, that fund alone has over \$200
10 million in assets. So I just want to highlight some of
11 these names, you see a lot of names, but it is not a lot
12 of dollars in some of those smaller names and older
13 positions within the portfolio.

14 If we look at the performance on page 3 for
15 the quarter, so the fourth quarter of 2025 we matched
16 the portfolio benchmark at 2.3 percent. For the year we
17 were under the benchmark, and it is the first time in
18 quite a while you've been under the benchmark. Most of
19 that driven by active managers who had more conservative
20 strategies in place that underperformed given the
21 environment that we were in. Long term you are pretty
22 close to your policy benchmark across the board.

23 Another thing I will point out on the bottom
24 right-hand table, summary of cash flows, given the
25 strong equity performance over the last five years or

1 really over the last decade, the fact that you are in a
2 positive cash flow perspective has benefited you
3 tremendously. Many pension funds are in a negative cash
4 flow position, which means you have to sell assets
5 periodically to fund benefit payments. You are not
6 contributing enough to the portfolio. Because you
7 haven't had to sell any assets, that means more assets
8 in the portfolio, in the markets to go up more with
9 investment performance.

10 So if you look at that, five years ago you
11 started off with \$600 million in investable assets.
12 You've added \$43 million in positive contributions, and
13 you've had almost \$300 million in investment gains which
14 brings you to the \$939 million. And this does not
15 include the parking assets. So the total value your
16 executive gave you earlier, that's going to be reflected
17 on the following page which will include the parking
18 assets.

19 Those are very positive figures. I always
20 like to highlight things where again the hard work you
21 have done from a budgeting perspective and the
22 sacrifices you've made to fund the pension have really
23 paid off in terms of investment performance.

24 The additional allocation including the
25 parking assets as reflected on pages 4 and 5. So that

1 total market value of \$1.26 billion is highlighted
2 there. The parking asset is a fixed asset. So we try
3 to look at the asset allocation of the portfolio
4 excluding the parking asset. Because as a group we have
5 no control over the performance of the parking asset.
6 It is based on the cash flows that have been committed
7 by the city over the next few decades, and that
8 basically calculates the present value of the asset
9 which is reflected in this page.

10 Your fixed income managers, which go down a
11 little bit below, CS McKee and Loop Capital are two
12 newer managers introduced in the portfolio in 2025. We
13 funded them with -- each of those managers had two \$25
14 million commitments of capital to them. So you can see
15 the most commitment of capital was made in the fourth
16 quarter of last year. We have had the nice problem, if
17 you want to call it that, of having to consistently
18 rebalance down from equities because they have been
19 performing so well. So in order to fund those new
20 commitments to fixed income, we trimmed from our
21 winners. We trimmed from US equities. So we have taken
22 about \$45 million last quarter from equities and moved
23 that back up into fixed income.

24 On page 5 you will see some of the
25 alternative managers. Not a lot of movement there.

1 They were all pretty close to our targets. So we have
2 not moved money into or out of those strategies.

3 Continuing on to page 6 some of the
4 alternative managers. What's not reflected on the top
5 of page 6 was the \$20 million commitment to Brightwood
6 that was approved by the board at the December meeting.
7 We are finalizing those agreements now, but you will
8 have a commitment to Brightwood Fund VI which we will
9 try to keep as a consistent allocation to that manager
10 and asset class. You do see reflected down here, which
11 has been approved and contract signed on, under private
12 equity you will see Siguler Guff Fund VI. It has dashes
13 in terms of market value because it is not called
14 capital yet, which you have made a commitment to that
15 investment and signed those contracts. The first two
16 funds you have had with them have been exceptionally
17 strong performers, and we expect the same level of
18 performance from them in the future.

19 I will jump forward to page 9. So as we
20 look at page 9 this shows the total portfolio. One
21 thing you will note is you might say if you look at the
22 summary of cash flows at the bottom of page 9, you say
23 well, you just told us a few pages prior you have
24 positive net cash flows. Because this includes the
25 parking asset, the distributions from the parking asset

1 that you receive are counted as negative cash flows.
2 That's where you see this showing negative numbers
3 because it takes what is in the invested portfolio with
4 also the parking asset cash flows are viewed as negative
5 because they are going out of that asset and into cash
6 within the portfolio, and that cash is spent for benefit
7 payments.

8 But, again, going from including the parking
9 asset 10 years ago, the total portfolio value is \$663
10 million, and now you are a little less than double that
11 over the last period, and investment earnings that have
12 \$744 million. So the same principles that we discussed
13 earlier still apply there.

14 MR. SICURO: Why is the ending market value
15 the same each year?

16 MR. WESNER: So the starting value is going
17 to be -- starting date is going to be different, but the
18 ending date is the same for all of those time periods.
19 So that ending market value will still be 12/31/2025 and
20 the starting value would be different for each of those
21 time periods.

22 In terms of overall performance -- I will
23 jump forward a few pages. I will jump forward to page
24 13, and so while the parking asset provides us with many
25 benefits, in years like 2023, 2024, 2025 when the equity

1 markets are performing very well, then even the kind of
2 7 percent, you know, or 7 and quarter percent rate of
3 return that you get from the parking asset, because
4 that's your assumed rate of return from the pension is
5 actually dilutive to portfolio performance.

6 I would never want to say that a 7 and
7 quarter percent consistent return is bad for a
8 portfolio, but your relative performance is going to be
9 lower in those strong years. It basically averages out
10 over the long term.

11 We do reflect performance two different
12 ways. One is the total fund composite which includes
13 the parking asset, and the other is the total invested
14 portfolio which does not include the parking asset.

15 If you look at those performance figures
16 over the 10 year, they are very close. So the total
17 fund is up an annualized 8.4 percent net of fees. The
18 total invested portfolio is up an annualized 8.7 percent
19 net of fees. Very close performance between those two.

20 When we think about those long-term rankings
21 we never want to be the top or the bottom because that
22 means you are either overexposed or underexposed to
23 equities. Kind of you are going to get long-term
24 performance, best long-term performance by hitting
25 singles and doubles and year after year having above

1 average but not necessarily the top decile performance
2 because there is only one way to get top decile
3 performance which is the overexposed to the best
4 performing asset class.

5 Your individual managers, everyone
6 performing I would say on this page as expected. So the
7 bottom half of page 13 is your fixed income managers.
8 The performance as expected there. Federated local
9 manager does a core plus strategy for you. They are
10 your largest exposure. CS McKee is another Marquette
11 top pick which happens to be a local manager here, is
12 one of the new managers. Then Loop Capital is the
13 second new manager down there.

14 US Equity which are on page 14, your overall
15 US Equity portfolio performed exceptionally well versus
16 the defined benefit plan universe. You were in the top
17 third of the universe last year, but you had one active
18 manager that did really well, Frontier in mid cap
19 growth, up 18 percent versus 12 percent for the
20 benchmark. Palisade which is another active manager.
21 We saw a lot of historically strong performing small cap
22 managers underperform significantly, and Palisade was
23 one of them. Palisade is getting close to a 3 year
24 track record now. We will have a discussion of whether
25 we need to put a strategy like that on to alert status.

1 When we made that allocation nearly three
2 years ago, we gave them half of the money, and we left
3 the other half indexed with Vanguard, and it was kind of
4 them getting the rest of the money was predicated on
5 them performing well. They haven't. We still haven't
6 given them the rest of the money that has been indexed
7 and you can also see index strategy has given you better
8 performance.

9 We will monitor that closely, but we are
10 getting that three year figure and that could be on
11 alert status if we don't see a change in overall
12 performance.

13 On the emerging manager side, these are two
14 local managers. One is Gridiron which does a closed end
15 fixed income strategy. The other is Twin Capital which
16 has an enhanced index. Gridiron, it looks like it is
17 below benchmark, and it is. That benchmark is not
18 really ideal for them. Their benchmark versus a core
19 universe. This is a strategy that I have a lot of
20 familiarity with in my past career working for a closed
21 end fund bond manager. Is it portfolio or strategy that
22 can take advantage of market dislocations. We have not
23 had one since they have been investing for you.

24 So that underperformance is not surprising,
25 but when we do get that market dislocation, I do expect

1 them to be pretty aggressive in repositioning the
2 portfolio. They have about \$5 million in assets. They
3 are a good local emerging manager, and I do think their
4 strategy has some upside potential.

5 International equities -- international
6 equities if you look at the middle bar, that broad
7 benchmark up 9.2 percent over the last 10 years. You
8 are in the top 14 percent of public pension fund peer
9 group for international equities over the last decade,
10 but the last year we underperformed pretty
11 significantly. Two of the three managers, you know, had
12 more material misses, but your largest manager, MFS, a
13 stellar long-term performer was off about 8 percent last
14 year. So more conservative positioning. They didn't
15 participate as much in the rally.

16 State Street and the SSgA and then ABS
17 emerging markets, they missed by 2 to 3 percent, but it
18 is challenging when all three miss. But longer term
19 these are three strong managers and no concerns over
20 that short-term market volatility.

21 Hedge strategies kind of the same thing. I
22 talked before about hedge strategies didn't go up as
23 much. We are not as worried about that in a strong up
24 market. Parametric which is your largest exposure was
25 up the most over the last -- over the long term here,

1 but ABS and Parametric both up 13 to 15 percent.
2 Entrust still has some reporting to come in, and those
3 figures should go up when we get the rest of the
4 reporting from them.

5 Real estate, 4 and a half percent for your
6 real estate managers on average. Again, rebounding.
7 Rreef is our long-term manager going forward. We will
8 continue to diversify this real estate positioning.

9 And then just wrapping up the private debt,
10 Partners Group and Brightwood respectively, those two
11 managers performing as we would like, and a lot of
12 upside there.

13 And then private equities on page 17, your
14 largest exposures are within the Siguler Guff strategies
15 which have been the best performers. The Crescent
16 strategies are more private debt. You see those have
17 been consistent, strong performers, but not nearly the
18 upside Siguler Guff gave you. So Siguler Guff is our
19 long-term strategy there within private equity.

20 Fees are listed at the end of this report.
21 I won't go over it. But just for transparency we always
22 have the fees you are paying to managers at the end of
23 the book. And, again, every dollar we can save in terms
24 of management fees is another dollar that's in the plan
25 to meet benefit payments. Between negotiating contracts

1 with managers and utilizing index funds that are low
2 cost, we can keep the overall cost of managing the
3 portfolio as low as possible.

4 Any questions? I know there is a lot, a lot
5 moving within the market these days.

6 MR. SICURO: Any questions for Jamie?

7 (No response.)

8 MR. SICURO: Seeing none, thank you very
9 much.

10 Our Solicitor's report. Mr. Frank.

11 MR. FRANK: Good afternoon. I am going to
12 hit the key items that I worked on since our last
13 meeting. We had a rather extensive right-to-know law
14 request from the Center for Retirement Research. It is
15 a nonprofit associated with Boston College. They wanted
16 all the GASB reports back to 2015. Completing the
17 report was somewhat time-consuming. Robin was very
18 helpful in helping me gather all the reports. My sense
19 is this is just simply a research company, and there is
20 no other agenda in these requests.

21 As you will see later in our agenda our
22 agreement with our actuary Foster & Foster will be
23 expiring in March. I worked with their executive on the
24 extension of the agreement which is subject to your
25 approval. Mr. Chair, I think it is better that I talk

1 about it when it comes up on the agenda.

2 Similarly, our agreement with the investment
3 consultant Marquette Associates is due for an extension.
4 I worked with Mr. Wesner on the addendum, and, again,
5 will be considering that later in the agenda, and I can
6 answer questions. Any questions?

7 MR. SICURO: Anyone have any questions for
8 Mr. Frank?

9 (No response.)

10 MR. SICURO: Seeing none, thank you very
11 much.

12 We are under the Presentation of
13 Resolutions. Resolution No. 1, authorizing the payment
14 for professional services rendered by Frank, Gale, Bails
15 and Pocrass PC for the month of December 2025 through
16 January 2026. Payment is authorized for services
17 rendered for \$6,700. Do we have a motion?

18 MR. URBANIC: Motion.

19 MR. RUFFOLO: Seconded.

20 MR. SICURO: Motion made by Mr. Urbanic,
21 seconded by Mr. Ruffolo. Any discussion on the motion?

22 (No response.)

23 MR. SICURO: Seeing none. All those signify
24 by saying aye.

25 (All say aye.)

1 MR. SICURO: Opposed?

2 (No response.)

3 MR. SICURO: Motion moved. That is it for
4 our Presentation. We are now under New Business. First
5 item is Resolution 2 which is the consideration of the
6 extension of Foster & Foster Consulting Actuaries,
7 Incorporated for a three year agreement. Do we want to
8 do the motion first --

9 MR. FRANK: No. 2 is Marquette.

10 MR. SICURO: I apologize. The No. 2
11 resolution is extension of the Marquette Associates for
12 a three year agreement and a 10 percent fee increase.
13 Can I get a motion, and then we will go into discussion
14 once it is seconded.

15 MS. HEISLER: I would make a motion to enter
16 into an extension with our relationship Marquette
17 Associates.

18 MR. SICURO: Motion made by Miss Heisler.

19 MR. LAVELLE: Second it.

20 MR. SICURO: We are under discussion, and we
21 can turn it over to Mr. Frank for some information.

22 MR. FRANK: The addendum that we have been
23 operating under has expired. The last fee increase that
24 Marquette received was in May of '23. So it is coming
25 up on three years. This resolution provides for a 10

1 percent increase which we can do without requiring an
2 RFP under the state pension act, and that's the
3 resolution, and it will extend it for an additional
4 three years.

5 MR. SICURO: Thank you, Mr. Frank. Mr.
6 Urbanic?

7 MR. URBANIC: Yes. When was the last time
8 we bid the RFP for the fund?

9 MR. FRANK: Long time because the original
10 agreement with Marquette was June 1, 2011. So it would
11 have been sometime prior -- it would have been 2011,
12 2010 that we would have done an RFP.

13 MR. WESNER: I think it was 2010. The last
14 fee increase was in May of 2020, and that agreement
15 expired in 2023. So it has been six years since the
16 last fee increase. 10 percent is a one and half percent
17 annualized increase.

18 MR. RUFFOLO: It was done because Mercer who
19 was prior got out of the municipal.

20 MR. WESNER: Yes.

21 MR. URBANIC: Just what I have learned over
22 my tenure here and elsewhere, typically the best
23 practice is to do an RFP every seven years. I am not
24 saying we have to, but we should think about it as we go
25 on the way. I think Marquette and Jamie in particular

1 has provided an excellent service to this City and to
2 this pension fund. But at the same time we should
3 consider it to stay above the fray, and along with
4 Foster & Foster too.

5 MR. SICURO: We will get to that. That's a
6 little different. On my portion, Marquette has done a
7 great job, and to me looking at our -- going back to
8 look at page 11, hitting above our assumed rate of a
9 return over a 10 year period, I think that's a good
10 achievement. Your strategy that you have provided to
11 all of us and we have adjusted over a number of years,
12 we have met or exceeded our mark and protected our fund
13 from the down-turn in the markets. I think the strategy
14 has worked very well. Not overly aggressive but still
15 being able to meet those assumed rate of returns.

16 I have been very happy since I have been on
17 this board, and it has been very pleasurable to work
18 with you here and have your reports and be able to
19 answer our questions. I certainly don't disagree with
20 Mr. Urbanic's issue under the professional guidelines
21 from the state that we should have these RFPs done.
22 They do come with a considerable cost, the work-up to do
23 them, but if that's what the board chooses to do, we
24 would move forward, but we would have to then decline
25 this resolution in order to do so.

1 MR. FRANK: Well, not necessarily. We could
2 make the contract extension for a shorter period of
3 time.

4 MR. SICURO: So we would amend.

5 MR. FRANK: We could amend it right on the
6 floor.

7 MR. LAVELLE: I am going to ask you a
8 question. You had mentioned page 11. I can see the
9 return. Where do I identify the assumed rate of return?

10 MR. SICURO: That's from our actuary and
11 that's our assumed rate of return adopted by the fund
12 which is 7 percent.

13 MR. WESNER: The contract is always
14 terminable by either party at 30 days notice. You don't
15 lock yourself into any long-term commitment with the
16 extension.

17 MR. URBANIC: If I may, my suggestion was to
18 just have the board take a look at it. I would consider
19 -- I will vote for a three year extension understanding
20 that we can terminate at any time. I think from a best
21 practice standpoint we should make a consideration and
22 see what else is out there. But it is typically
23 expensive as well.

24 MR. SICURO: I hear what you are saying.
25 Obviously if that's what we want to do. I don't know if

1 we want to do it at this meeting or we want to revisit
2 it at a later point since we have opportunities we can
3 do that at a later point.

4 MR. RUFFOLO: I agree with the three year
5 extension and review it down the road. We have time to
6 do that. It can be done any time.

7 MR. SICURO: Fair enough. Any more
8 discussions on the resolution itself?

9 (No response.)

10 MR. SICURO: Seeing none. All those in
11 favor of the Resolution No. 2, the extension of
12 Marquette with the additional 10 percent fees, please
13 say aye.

14 (All say aye.)

15 MR. SICURO: Opposed?

16 (No response.)

17 MR. SICURO: Motion moves. Thank you all
18 for the discussion.

19 Now we have Resolution 3. This one is to
20 consider the extension of Foster & Foster Consulting
21 Actuaries, Incorporated's agreement of a three year
22 period. Do we have a motion for discussion?

23 MR. RUFFOLO: I will make a motion for
24 discussion.

25 MR. LAVELLE: Second.

1 MR. SICURO: We have a motion by Mr.
2 Ruffolo, seconded by Mr. Lavelle. Under discussion. I
3 wanted to clarify something before Mr. Urbanic started.
4 Foster & Foster is working under the first contract; am
5 I correct?

6 MR. FRANK: Correct.

7 MR. SICURO: There is a little different
8 circumstances.

9 MR. URBANIC: I wasn't sure if they were a
10 merger of the previous --

11 MR. SICURO: No. Is there any further
12 discussions on the motion?

13 MR. RUFFOLO: Yes. In September the FOP
14 requested documents, pension documents from Foster &
15 Foster for our arbitration, contract arbitration. The
16 request was initially made to our attorneys and our
17 actuary. We never received this initial request. I
18 know a month or two later there was another email that
19 went out, but it did not get the information from there.

20 After the December meeting, after the
21 regular course of business, I was informed that the law
22 department had turned down supplying, providing these
23 documents to us. I was informed the request had to go
24 through a member or through our solicitor.
25 Subsequently, Frederick was contacted by the law

1 department on this. We still were never delivered -- to
2 my knowledge we were still never delivered the documents
3 that were requested.

4 I know that Foster & Foster is hired by the
5 Pension Trust Board as the actuary, and I'm not 100
6 percent sure if they are hired by the City also, and
7 over the years we have had independents. I know at
8 least one contract that the actuary was both for the
9 City and the Pension. I don't know if that's the case
10 or not this year. I believe that these documents should
11 have been provided to us either through the board,
12 through the attorneys. Which I believe this was done in
13 previous contracts, the attorneys requesting information
14 about it or through Frederick. Thank you.

15 MR. FRANK: I advised that those documents
16 should be released, because I felt they would be
17 available to the public through a right-to-know request,
18 and this is the first I am hearing they were not
19 supplied. If somebody brought this to my attention I
20 would have dealt with it.

21 MR. SICURO: So this is a bit of a concern
22 that we had. I think we talked about this at one point
23 where the City wanted to be able to utilize the actuary
24 for their business, for things that they conducted. I
25 could speak to my hat as the union president for the

1 firefighters. They did use Foster & Foster in our
2 negotiations. We didn't have a problem, but there was
3 no information request on our end. So we didn't have
4 the same circumstances.

5 Frederick, is there a problem if we say --
6 if we are going to agree to this extension and retain
7 Foster & Foster, that it sounds like a bit of conflict
8 of interest that we would ask they do not conduct
9 business with Foster & Foster from the City side. If
10 they want information for the City purposes they can
11 request it as if anybody else is requesting it.

12 MR. FRANK: Well, I'm not sure at this point
13 what, if any, and maybe our executive director can
14 answer this, what Foster & Foster is doing for the City
15 per se. It is doing it for the GASB reports they do for
16 the three pension funds which are independent of the
17 City. So I don't view it as a conflict unless they are
18 doing something for the City. It is my understanding
19 that the FOP had a different actuary that they are
20 using. It was not Foster & Foster.

21 MR. SICURO: Again, in my experience, I
22 don't want to speak for Mr. Ruffolo, he can do that
23 part. I know that when Foster & Foster was present
24 during our time, they were not there representing this
25 board. They were there representing and being paid

1 for -- there was no conflict as far as compensation --
2 they were there representing the City of Pittsburgh on
3 matters dealing with pension entitlements or benefit
4 entitlements. They were not an independent third party
5 being asked questions from the dealings that I had with
6 them and the City. I don't know if that is the same for
7 Mr. Ruffolo's point of view when they were dealing with
8 them. I didn't see a conflict in my case. It sounds
9 like there was some sort of conflict in this particular
10 case. I don't know if you want to speak on it.

11 MR. RUFFOLO: It is six months since we
12 initiated action to get these documents, and we still to
13 this date February, we still don't have them. Although
14 now, I will point out to my president over here, it is a
15 dead issue now because we proceeded to executive
16 session.

17 MR. SICURO: Was Foster & Foster acting in
18 that capacity representing this board or the City of
19 Pittsburgh in those discussions or arbitrations?

20 MR. RUFFOLO: They were there but not
21 providing the documents needed for us on our part.

22 MS. HEISLER: Foster & Foster wouldn't
23 respond to you as a board member on this?

24 MR. RUFFOLO: I didn't send out direct
25 information. It eventually went through our attorney,

1 our attorneys, the lodge attorneys and a Jason Fine who
2 was the previous actuary for this board and the City.
3 But in previous contracts, our independent actuary
4 requested information and got it. This was different
5 this time. The request was made first through them and
6 not through me.

7 MS. HEISLER: Maybe that was the difference.

8 MR. RUFFOLO: I got an email. I can't
9 remember exactly. It was two months later so probably
10 November, that they still had not -- the FOP had sent to
11 him requesting the information and still had not got it.
12 There was no response. At the December meeting we found
13 out this information that Jason said he had been told no
14 by the law department to provide those documents.

15 MS. HEISLER: The law department for this
16 contract like --

17 MR. SICURO: That's where I believe they
18 were acting as an agent of the City.

19 MS. HEISLER: Because the right-to-know
20 request for this contract would have gone to Frederick.

21 MS. GULA: Right.

22 MR. FRANK: I spoke to the attorney that was
23 representing the City, and I advised that I felt these
24 were public documents and should be produced. Now, I
25 thought it was resolved. This is the first I am hearing

1 it is not.

2 MS. GULA: I can concur with Frederick
3 because I was also privy to that conversation and told
4 the city attorney that they should contact CMPTF
5 Attorney Mr. Frank, and I know for a fact he advised and
6 he also had further communication with me that that is
7 what he told her, and she confirmed it. I didn't know
8 they didn't receive the information.

9 MS. HEISLER: The solicitor's office
10 wouldn't have anything to do with this request. I'm not
11 saying they didn't. I am saying they shouldn't.

12 MR. URBANIC: Just to understand, the
13 request is for existing information. It is not --

14 MR. RUFFOLO: For the valuation they
15 reported on at the September meeting.

16 MR. URBANIC: That's pretty cut and dry. It
17 is either done or not.

18 MR. FRANK: I think if we can have a policy
19 here if there is any request for Foster & Foster
20 information, it is directed to me, and I can make sure
21 it happens.

22 MR. SICURO: We can do that through a
23 policy.

24 MR. FRANK: Yes. I think that's what the
25 procedure should be, and I will determine whether there

1 is anything that shouldn't be produced, although I think
2 it is unlikely. The other thing is -- some of the items
3 that I saw that were being requested would be to create
4 a document that didn't exist, and we are not required to
5 do that in the right-to-know law.

6 MR. SICURO: I don't want to lose the train
7 of thought on the policy so we don't miss this. Is this
8 something we need to do right this minute or we have the
9 executive director produce and present to the board for
10 adoption?

11 MR. FRANK: We can do that in the next
12 meeting. In the interim, I think maybe that should be
13 understood how we are going to handle this so we don't
14 have this problem.

15 MS. HEISLER: Request for information from
16 comp board vendors can be directed to the solicitor of
17 the fund, Mr. Frank.

18 MR. FRANK: Okay. We can have a resolution
19 on the next one.

20 MR. SICURO: Thank you. We are still under
21 Resolution 3. Is there any more discussion on
22 Resolution 3?

23 (No response.)

24 MR. SICURO: Seeing none, all those in favor
25 signify by saying aye.

1 (All say aye.)

2 MR. RUFFOLO: No vote. Opposed.

3 MR. SICURO: We have one opposed.

4 Resolution passes.

5 Our last business under New Business is the
6 election of the secretary of the board. Former
7 municipal representative Mr. Cornell, who has sent his
8 resignation in, was the secretary. We need to replace
9 that position until our next meeting which we will do at
10 our reorganization meeting in May. Do I have a
11 nomination for secretary of the board?

12 MS. HEISLER: I would vote to nominate City
13 Treasurer Mr. Bill Urbanic.

14 MR. LAVELLE: I will second it.

15 MR. SICURO: Second by Mr. Lavelle. Is
16 there any other nominations?

17 (No response.)

18 MR. SICURO: Seeing none, any discussions on
19 the nomination?

20 (No response.)

21 MR. SICURO: Seeing none. All those in
22 favor say aye.

23 (All say aye.)

24 MR. SICURO: Opposed?

25 (No response.)

1 MR. SICURO: Congratulations, Mr. Urbanic.

2 Are there any issues that anybody on the board would
3 like to discuss?

4 MR. RUFFOLO: I would like to welcome the
5 two new board members.

6 MR. SICURO: Very good. Congratulations.
7 Welcome aboard. Hopefully you will be able to make all
8 the meetings and participate in our subcommittees.

9 Do I have a motion to adjourn?

10 MS. HEISLER: Motion to adjourn.

11 MR. URBANIC: Second.

12 MR. SICURO: All those in favor signify by
13 saying aye.

14 (All say aye.)

15 MR. SICURO: Opposed?

16 (No response.)

17 MR. SICURO: Thank you very much, everybody.

18 (Thereupon, at 2:06 p.m., the meeting was adjourned.)
